

TANNISOL

PREVENTS AND TREATS WINE FAULTS

COMPOSITION

Potassium metabisulphite, L-ascorbic acid, tannin

GENERAL FEATURES

Appearance: white-beige tablets, slightly smelling of sulphur dioxide.

Special pre-dosed sulphur-tannin-vitamin compound resulting from a unique manufacturing procedure.

TANNISOL prevents and remediates casse, wine ropes and other wine faults; it preserves wine from oxidative modifications and keeps fined and filtered wine clear.

TANNISOL comes in tablet form.

APPLICATIONS

Ideal for weak wines with low acidity and alcoholic strength. Also effective in preserving wine contained in partly filled bottles.

TANNISOL is indispensable after racking off, during transportation and during warm weather.

TANNISOL remediates wine affected by oxidative casse, restoring the original brightness of the wine.

DOSAGE

1 tablet/hL for finished red wines

2 tablets/hL for unfiltered red wines and white wines in general

1 tablet/hL for preventative purposes

2 tablets/hL for repressive-curative purposes

INSTRUCTIONS FOR USE

Add the tablet intact for a gradual effect, otherwise break into smaller pieces or crush for a faster effect.

PACKAGING AND STORAGE

100 tube box. Each tube contains ten 10g tablets.

Product approved for winemaking, in accordance with:
CE 1493/99
